

Anyone knows this new 2d side scrolling game?

Posted by Icegirl - 2009/07/15 00:39

I was surfing the net and this game called WonderKing Online caught my attention. When I check it in the trailer of this game it seemed like Maple story isn't it? What do you think?

Is this game gonna beat the Maple Story?

I haven't tried Maple Story or any casual MMO I'm guessing it's gonna be good now that it's by Ndoors Interactive.

But they still have different features

Wonderking Online

Graphics: Similar to MapleStory

Jobs: Four basic jobs, and 28 jobs will be available after job change

Game System: Quest, shop, guild, group, pet, friend, cooking, personal space, weapon combination and upgrade, siege battle

MapleStory

Graphics: Fresh, cute and gorgeous

Jobs: Four basic jobs, and 27 jobs will be available after job change

Game Systems: Family, shop, quest, group, friend, pet, weapon upgrade, forging (below lv 50)

Wonderking has a siege battle?

Hmm...

Seems like a serious casual game then. Forgive me for being ironic.

Hope it's not a grindfest like maplestory :S

I hope so...

if it is a grindfest game, it could discourage casual gamers

I couldn't really care. It's gonna be the first 2D side scrolling game I'm gonna try (save the simply web-based games) thus I'm excited about its closed beta.

Honestly, I think it's a game for young people. But maybe I'll give it a try and see if it's addicting. :P

i tried it for a couple of hours...and so far the game's good
it'll remind you of the classic arcade games because of the side-scroll action

it's also hard to differentiate between maple story and wonderking even if both have the same gameplay
and appearance and i only played maple story for a very short time

It's a total lagger game

since many players are trying the wonderking, so it's expected to be laggy and usually they use 20-35% of their server during close beta

Just my opinion. I like Grand Chase better.

grand chase has cute avatars and costume design
but it feels kinda grindfest for a causal game
